

El ejemplo se basa en la investigacion de autorizar trabajos mediante autorizaciones en una empresa.

Solamente tienen autorizacion de cambio de Clave y de Listado

george	General Manager	admin
adam	Manager R.Human	admin

El programa por defecto si no existe el fichero "control.dbf" crea la clave de acceso ---> 'admin' 'General Manager' 'admin'

Se ha creado para el ejemplo unos nombres imaginarios y unos cargos, que debe borrar cuando quiera y crear un nuevo fichero que se creara automatico.

george	General Manager	admin
adam	Manager R.Human	admin
alfred	Manager Financial	admin
betty	Section Chief	admin
donna	Administrative Officer 1 ^a	admin
eric	Administrative Officer 2 ^a	admin
franck	Administrative Assistant	admin
bruce	Broker	4321
donald	Broker	4321
kenth	Stock Foreman	1234
mike	Officer 1 ^a Stock	1234
smith	Officer 2 ^a Stock	1234
robert	Boy Stock	1234

Espero que les guste, saludos
Mustafa

----- Google -----

The example is based on research papers authorizing authorizations by a company.
Only have authorization and Key exchange Listing

george	General Manager	admin
adam	Manager R.Human	admin

The program by default if there is no file "control.dbf" creates the password ---> 'admin' 'General Manager' 'admin'

It has been created for such imaginary names and some charges must clear whenever and create a new file which create automatic.

george	General Manager	admin
adam	Manager R.Human	admin
alfred	Manager Financial	admin
betty	Section Chief	admin
donna	Administrative Officer 1 ^a	admin
eric	Administrative Officer 2 ^a	admin
franck	Administrative Assistant	admin
bruce	Broker	4321
donald	Broker	4321
kenth	Stock Foreman	1234
mike	Officer 1 ^a Stock	1234
smith	Officer 2 ^a Stock	1234
robert	Boy Stock	1234

Hope you like it, greetings
Mustafa
